Revision Date: June 2024

General Revisions

- **Standards Document**
  The title was revised from *2023 SC CCR Mathematics Standards* to *2025 SC CCR Mathematics Standards* and all instances of 2023 were changed to 2025 to align with the implementation date.

- **Definition of Trapezoid (pg. 41, 51, 67, 76, 83)**
  Trapezoid was defined as "A quadrilateral with exactly one pair of parallel sides." This definition was added to the indicator insights for 3.MGSR.3.2, 4.MGSR.3.2, 6.MGSR.1.1, 7.MGSR.1.5 (both 7th grade and compacted versions).

Elementary Revisions

- **K.PAFR.2.1 (pg.20)**
  The patterns within the indicator have been italicized.

- **1.MGSR.2.3 (pg. 24)**
  In the insight, a paragraph that contained wording related to indicator 1.MGSR.2.5 was removed as it was a copy/paste error.

- **2nd Grade Overview (pg. 29)**
  In the PAFR paragraph, on the third line, 999 was changed to 100.

- **2.NR.3.2 (pg. 33)**
  In the indicator insight, the sentence "2nd grade transitions from a number path to number line" was deleted.

- **4th Grade Overview (pg. 46)**
  In the MGSR paragraph on line 8, deleted "pentagons and hexagons".

- **5.DPSR.1.1 (pg. 58)**
  The last sentence was changed to limit decimals from thousandths place to hundredths place to match the limits set in 5.PAFR.1.3.

- **5.PAFR.1.3 (pg. 61)**
  An extra period at the end of the indicator was removed.

Middle School Revisions

- **6.NR.2.1 (pg. 69)**
  Removed "Include absolute value, which is introduced in 6.NR.2.4, and negative integers" from the indicator insight.

- **6.NR.2.2 (pg. 69)**
  Removed indicator insight and replaced with "Use number lines to help students visualize placing positive rational numbers in order."
- **6.PAFR.1.2 (pg. 69)**
  Added "Use multiple representations of functions." to indicator insight.

- **6.PAFR.3.6 (pg.71)**
  Removed the limitations on fraction denominators.

- **7th Grade Overview (pg. 72, 79)**
  Eliminated the reference to double displays. 7th grade overview was rewritten as, "In the DPSR strand, seventh graders will continue their analysis of data sets by creating and analyzing displays, including stem-and-leaf plots and histograms." 7th grade compacted overview was rewritten as, "In the DPSR strand, seventh graders taking this course will continue their analysis of data sets by creating and analyzing displays, including stem-and-leaf plots and histograms."

- **7.DPSR.2.2 (pg. 75)**
  Removed the statement in the indicator insight, "Include replacement when finding probability." Compound events are not in 7th grade.

- **7.DPSR.2.4 (pg. 75)**
  Added "and" to the indicator insight between "spinning a spinner" and "randomly selecting" to make grammatically correct.

- **7.MGSR.1.5 (pg. 76)**
  Deleted, "Show that the volume of a cone is 1/3 the volume of a cylinder with congruent heights and bases through hands-on experiences." from the indicator insight because 7th grade is not working with cones.

- **8th Grade Overview (pg.89)**
  In DPSR paragraph, edited the 3rd line to say, "Students will describe associations among the data points in a scatterplot based on direction, form, and strength."

- **8.MGSR.1.2 (pg. 92)**
  Italicized Pythagorean Theorem.

- **8.MGSR.1.3 (pg. 92)**

Added “Include three-dimensional situations.” to the indicator insight.

- **8.NR.2.2 (pg. 94)**
  Added “Classify and order simplified expressions.” to indicator insight.

- **8th Grade and Geometry with Statistics Overview (pg. 97)**
  Edited the second line in the second paragraph to say “first of four required courses”.

- **8th Grade and Geometry with Statistics (pg. 102)**
  Standard 8.MGSR.2 was reworded to match the standard in 6-8. “Determine angle and/or side relationships.”

High School Revisions

- **A1.NR.2.1 (pg. 122)**
  Reworded indicator insight to say, “Discuss when rational exponents or radical forms may be more useful given the mathematical or real-world context involved.”

- **A1.PAFR.1.1 (pg. 122)**
  Reworded indicator insight to say, “Single variable forms may have analogous two-variable forms. Analogous forms include for linear: standard, y-intercept, and point slope, for quadratic: vertex, standard, and factored. For exponential, limit to the same bases.”

- **A1.PAFR.4.1 (pg. 125)**
  Corrected the indicator to be “Describe the effect of the transformations $kf(x)$, $f(x)+k$, $f(x-k)$, and combinations of such transformations on the graph of parent function $y = f(x)$ for any real number k; find the value of k given the graphs; and write the equation of a transformed parent function given its graph.”

- **A2P.PAFR.3.1 (pg. 132)**
  Removed an extra period at the end of the indicator number.

- **A2P.PAFR.4.1 (pg. 132)**
  Corrected the indicator to be “Identify the effect on the graph of replacing $f(x)$ by $kf(x)$, $f(x)+k$, $f(x-k)$, $f(kx)$ for any real number k including multiple transformations; write an equation of a transformed parent function given its graph. Extend to equations involving rational, polynomial, radical, exponential, and piecewise.”

- **PC.PAFR.1.4 (pg. 139)**
  Corrected the indicator to be "Graph and describe the effect on the graph $f(xx$ of $f(x)$+k, $f(x$-$k)$, $kf(x)$, and $f(kx)$, for specific values of both negative and positive values of k."

- **C.PAFR.4.3 and C.PAFR.4.4 (pg. 148)**
  Changed the last sentence to contain a correct form of "f" to represent a function; "…and to identify relative and absolute extrema of f."

Revision Date: July 2025

General Revisions

- **Entire Document**
  "Scatter plot" changed to "scatterplot" throughout the entire document.

Elementary Revisions

- **1.PAFR.2.1 (pg. 28)**
  Added a period between PAFR and 2.1.

- **3.NR.1.1 (pg.41)**
  Added the word "form" in the indicator to make it say, "standard form".

- **3.NR.2.5 (pg. 43)**
  Deleted "based on the same size whole" from the indicator.

- **4.MGSR.3.1 (pg. 51)**
  Added "An isosceles triangle is a triangle that has 2 equal sides. An equilateral triangle can be classified as both equilateral and isosceles because it meets the definition for both." to the indicator insight.

Middle School Revisions

- **6.DPSR.2.1 (pg. 67)**
  Changed "equally probable" to "equally likely" in indicator insight.

- **6.DPSR.2.2 (pg. 67)**
  Added 20 and 200 as denominators in the limits to make consistent with 6.NR.1.

- **6.MGSR.1.3 (pg. 67)**
  Added the word “right” for rectangular prisms and rectangular pyramids to help clear up confusion on what types of prisms and pyramids students should be working with.

- **7.DPSR.1.4 (pg. 74 and 82)**
  Added “Intervals are also called bins.” to the indicator insight.

- **7.DPSR.2.1 (pg. 75 and 82)**
  Edited the indicator insight to contain “unique outcomes” to define sample space.

- **7.DPSR.2.4 (pg. 75 and 82)**
  Added “and” between “spinner,” and “randomly” in the insight. Also, removed the sentence “Have students determine if games are fair or unfair.”

- **8.DPSR.1.1 (pg. 91 and 99)**
  Added the word “bivariate” to the indicator insight. “Analyze the correlation of bivariate data points to determine whether it is strong, weak, or has no correlation.”

- **8.DPSR.1.2 (pg. 91 and 100)**
  Corrected the indicator to read, “Draw inferences about two populations utilizing representative random samples of comparisons of the shape of the distribution, measures of center, and measures of variability. Limit measures to *mean, median, mode, range, mean absolute deviation, and interquartile range*.” Also reworded the indicator insight to say, “Use visuals such as box plots or stem-and-leaf plots to compare two different populations.”

- **8.PAFR.2.1 (pg. 87 and 95)**
  Changed indicator insight to read, “Utilize previously learned knowledge of writing and solving equations and inequalities as a foundation to introduce variables on both sides.”

- **8.PAFR.2.4 (pg. 95 and 107)**
  Changed “are” in the indicator insight to be “is” to make it grammatically correct.

High School Revisions

- **RM.PAFR.3.1 (pg. 155)**
  Changed indicator insight to read, “Newton’s Law of Cooling”.

Revision Date: July 2026

General Revisions

- **Coding (pg. 9)**
  Added graphic to identify coding of standards.

- **Appendix A (pg. 176)**
  Updated course pathways graphic to reflect change in AP Statistics.

Elementary Revisions

- **3.MGSR.2.2 (pg. 40)**
  Added to the insight: “Explore how the hour hand moves in relation to the minute hand.”

- **3.MGSR.3.1 (pg.41)**
  Added to the insight: “Include exposure to geometric symbols associated with angles.”

- **3.MGSR.3.2 (pg. 41)**
  Added to the insight: “Include exposure to geometric symbols associated with lines, angles, etc.”

- **4.MGSR.3.1 (pg. 51)**
  Added “Include exposure to geometric symbols associated with lines, angles, etc.” to the indicator insight.

- **4.MGSR.3.2 (pg. 51)**
  Added “Include exposure to geometric symbols associated with lines, angles, etc.” to the indicator insight.

Middle School Revisions

- **6.DPSR.1.1 (pg. 66)**
  Added to indicator insight: “Have students identify whether a sample is representative of a population and determine the appropriate population from which the sample was drawn.”

- **6.NR.2.2 (pg. 69)**
  Added “and include zero” to the indicator insight.

- **6.PAFR.1.1 (pg. 69)**
  Added to the indicator insight: “Include the use of function notation such as *f(x)* or *g(x)* when working with function tables.”

- **6.PAFR.1.2 (pg. 69)**
  Added to the indicator insight: “Include the use of function notation such as *f(x)* or *g(x)* when working with function tables.”

- **6.PAFR.2.8 (pg. 70)**
  Added to the indicator insight: “Use different representations to find missing values of equivalent ratios.”

- **7.PAFR.1.1 (pg. 77 and 86)**
  Added more examples to the indicator insight. It now reads, “Use a variety of situations, including, but not limited to, markups (percent increase), markdowns (percent decrease), tips, tax, coupons, discounts, commission, percent error, depreciation, simple interest, speed, unit price, and population density.”

- **7.PAFR.1.2 (pg. 77 and 86)**
  Added to the indicator insight: “Include the use of function notation such as *f(x)* or *g(x)* when working with function tables.”

- **8.DPSR.1.1 (pg. 91 and 99)**
  Replaced “correlation” with “association” in the indicator insight.

- **8.PAFR.1.3 (pg. 87 and 95)**
  Added to the indicator insight: “Include function notation such as *f(x)* or *g(x)*.”

- **8.PAFR.1.5 (pg. 95 and 106)**
  Added to the indicator insight: “Include function notation such as f(x) or g(x) when comparing functions.”

High School Revisions

- **A1.DPSR.1.4 (pg. 120)**
  Added to the indicator insight: "Use the boundaries to determine the strength of the correlation: none [0, 0.2), weak [0.2, 0.5), moderate [0.5, 0.7), or strong [0.7,1]."

- **AM.PAFR.2.2 (pg. 162)**
  Removed from the indicator insight: “Calculating the proper size of a water service line and drainage fixture units for a given pipe size.”
