Public School Education

In Prince Edward Island, the public school system embodies kindergarten through grade 12. For program planning purposes, four Key Stages categorize grades as follows:

- Key Stage 1 - Primary grades of K-3
- Key Stage 2 - Elementary grades of 4-6
- Key Stage 3 - Intermediate grades of 7-9
- Key Stage 4 - Senior high grades of 10-12

The provincial public education program is taught in schools organized within the Public Schools Branch and La Commission scolaire de langue française.

A full school program is available for both English language and French language education. The schools of La Commission scolaire de langue française operate in the French language. Second language courses are available in all schools, with instruction beginning no later than grade four. Early French immersion and late French immersion programs are available in some English language Schools.

Additional information on public education is available on the Department of Education and Lifelong Learning website https://www.princeedwardisland.ca/en/topic/education-and-lifelong-learning

Philosophy of Public Education

A Philosophy of Public Education for Prince Edward Island Schools was adopted in 1990. It contains a statement of the purpose, principles, and goals, summarized below, along with the supporting rationale and context.

Purpose
The purpose of the Prince Edward Island public education system is to provide for the development of children so that each child may take a meaningful place in society.

Basic Principles
Public education in PEI is based on a quality program that respects the intrinsic value of the individual and centres on the development of each child.

The public education system recognizes that education is a responsibility shared among the school, the family, and the community.

The public education system demonstrates respect and support for fundamental human rights as identified in the *Canadian Charter of Rights and Freedoms* and the *PEI Human Rights Act*.

The public education system reflects the character, cultural heritage, and democratic institutions of the society it serves.

The public education system programs reflect a current view of the knowledge, skills, and attitudes that competencies of most worth to the individual and society.

The goals of public education are to enable the student to

- develop an appreciation for learning, an intellectual curiosity, and a desire for lifelong learning;
- develop the ability to think critically, apply knowledge, and make informed decisions;
- acquire the basic knowledge and skills necessary to comprehend and express ideas through the use of words, numbers, and other symbols;
- develop an understanding of the natural world and of the applications of science and technology in society;
- acquire knowledge about the past and an orientation to the future;
- develop an appreciation for one's heritage and a respect for the culture and traditions of others;
- develop a sense of self-worth;
- develop a respect for community values, a sense of personal values, and a responsibility for one's actions;
- develop a sense of pride and respect for one's community, province, and country;
- develop a sense of stewardship for the environment;
- develop creative skills, including those in the arts, and an appreciation of creativity in others;

- develop skills and attitudes related to the workplace;
- develop good mental and physical health, and the ability to use leisure time creatively;
- acquire knowledge of the second official language and an understanding of the bilingual nature of the country;
- develop an understanding of gender equity issues and of the need to provide equal opportunities for all;
- develop an understanding of fundamental human rights and an appreciation for the worth of all individuals.

The provincial curriculum is of prime importance in addressing the goals. The curriculum may be defined as all of the experiences, formal and informal, which the student encounters under the school's guidance. This document, Program of Studies and List of Authorized Materials, outlines the formal school program.

Curriculum guides clearly articulate what students are expected to know and be able to do. Delivery of curriculum must reflect these expectations, and there must be an accurate assessment of students' performance concerning the curriculum outcomes.

English Programs

Mandate

The English Education, Programs and Services Division provides quality English language curriculum and support services to teachers and students. It provides leadership and coordination in the development of quality learning opportunities for all students.

There are more than 200 courses in the public school curriculum. With such a large number of courses, course development and renewal are a continuous one. The procedures for conducting such work are described below.

Program and Course Development/Renewal Procedure

Renewal of curriculum begins with the common understanding that Grades K-12 students must be educated to participate in a world of rapid and complex change. This dynamically evolving environment requires that students develop multiple literacies that increase depth of knowledge and acquire a range of competencies. Students must also develop a desire for personal and collective achievement and a willingness to collaborate for the well-being of themselves, others, and their planet.

With these and other worthy goals in mind, everyone involved in Prince Edward Island students' education must have an in-depth understanding of grade-level expectations for learning in all areas of study.

Since the implementation of the 2006 Student Achievement Action Plan, which resulted from the PEI Task Force report on Student Achievement, curriculum development and renewal has been, and continues to be, a priority. Island teachers continue to be actively involved in working with Department leaders to create and develop provincial curriculum. The goals of curricular renewal are achieved through:

- clarifying expectations, outcomes, standards, and benchmarks for students;
- ensuring relevance and consistency for all students across grade levels and areas of study;
- focusing on central tenets and developing deep understanding within areas of study (which are living disciplines);
- incorporating effective research-based instruction and assessment practices, and providing ease of access and use for teachers; and
- promoting a contextualized and constructivist approach to instruction and learning.

Teachers and Department leaders collaborate in evaluating and selecting appropriate student and teacher resources to support the curriculum with consideration for the following six actions:

1. The Department of Education and Lifelong Learning assesses the effectiveness of existing programs and school courses in consideration of the province's educational goals and the students' needs. The following information is used as part of the assessment process:
    a. reports from teachers;
    b. submissions from school authorities;
    c. submissions from community groups;
    d. government studies and initiatives;
    e. academic and professional literature in education; and
    f. results of provincial, national and international assessments.

2. The decision to proceed, or not, with the development of a revision project is made by the Department based upon:
    a. the result of the assessment;
    b. the impact on other existing courses/programs;
    c. recommendations from appropriate curriculum committees; and
    d. fiscal considerations.

3. The curriculum development work is carried out by an ad hoc curriculum committee in conjunction with a Department of Education and Lifelong Learning leaders. Nominations to a committee are requested from education authorities, and, if appropriate, from educational partners, such as Holland College or the University of Prince Edward Island. The committee
    a. assesses strengths and weaknesses of the present course or program;
    b. determines, with reference to provincial education goals and any appropriate foundation documents, the outcomes for the new or revised course;
    c. evaluates instructional materials;
    d. outlines a course of studies; and
    e. makes recommendations on pilot projects and in-service training for pilot teachers.

4. Based on recommendations from the ad hoc committee, the leader
    a. submits a request to the Director for final approval;

b. consults with education authorities to identify pilot schools and teachers; and

c. ensures that pilot materials are ordered and that appropriate in-service training is carried out.

5. The Department of Education and Lifelong Learning monitors the progress of each pilot project and

    a. recommends discontinuing the project, continuing the project, or proceeding to implement a new or revised course;

    b. revises, as needed, the course of study to reflect any course changes; and

    c. makes provision for in-service training and other supports which will ensure effective implementation.

6. The Department of Education and Lifelong Learning will prioritize the following areas of learning for program and course renewal;

    a. essential graduation competencies

    b. inquiry-based learning

    c. project-based learning

    d. experiential learning

Fair Presentation of Cultural and Other Groups

The Department of Education and Lifelong Learning recognizes that fair comment respecting any group is to be assured in school. Furthermore, stereotypes are to be avoided, whether in association with gender or any other characteristic. Therefore, in the curriculum planning process, curriculum committees, curriculum specialists, and the coordinator are directed as follows:

a. To evaluate aims, instructional materials, and courses of study to ensure fair and reasoned comment upon the characteristics or practices of any cultural group. Fair and reasoned comment is characterized by, for example, providing clear and reasonably complete explanations of characteristics and practices, distinguishing between facts and inferences or value judgements in discussions of characteristics and practices, and discouraging students from making hasty value judgments about characteristics and practices of specific cultures.

b. To evaluate educational aims, instructional materials, and courses of study to ensure that people's generalizations are based upon reasonable evidence and that stereotypes are avoided.

The resource called *Evaluation and Selection of Learning Resources: A Guide* is used to evaluate instructional materials.

The following guidelines apply in evaluating instructional materials:

1. Texts and other instructional materials should portray a wide variety of occupations, activities, and interests as being equally suitable for diverse gender identities.
2. Human experiences presented in textbooks should include references to diverse gender identities.
3. Messages about society and an individual's place in it should imply equality of diverse gender identities.
4. The resource can be accessed at www.gov.pe.ca/photos/original/ed_ESLR_08.pdf

Intermediate School

In Key Stage Three, Grades 7 to 9 are treated as a unit for program planning purposes. The courses that make up the program are designed to meet students' needs, interests, and intermediate school age skills.

The intermediate school program is a broad one intended to foster students' intellectual, physical, emotional, and cultural growth and development. To be successful, the program must be appropriate and the ambiance of the school constructive. An appropriate program includes the tasks, challenges, experiences, and materials suitable for the students' abilities. The school atmosphere must be one in which students feel that they are liked and supported, achievements and shortcomings are recognized, and individual improvements and abilities are encouraged. Comparisons with others should not be over-stressed.

The intermediate school and its program should encourage students to broaden their interests by exploring and expand their opportunities through programs such as art, music, career and technical education, a second language and many other courses' broadened nature. Exposure to new areas of study takes place within all of the subjects.

The intermediate school years form an important period in students' progress toward independence. Both the school and its program should assist students toward this objective. Opportunities for responsibility and leadership are to be encouraged. Students should have occasions to discuss the responsibilities and the discipline needed for independence and effective leadership. Furthermore, those opportunities for independence and leadership that the school provides to students should always be responsible for the consequences. Outside of the instructional program, student government, student librarians, student assistants concerning sports, music, drama, or a school newspaper are examples of areas in which increased student responsibility and leadership are appropriate.

The Department of Education and Lifelong Learning is in the process of the Intermediate Curriculum Delivery Renewal (ICDR) using the following guiding principles to reimagine the Key Stage Three experience:

- engage in relevant and meaningful curriculum with a focus on experiential learning,
- enhance relationships,
- provide equity across programs, and
- provide daily opportunities for movement and/or experiential learning.

Intermediate students will have opportunities to:

- explore interests;
- develop skills in the Arts, CTE and technology; and
- explore graduation competencies.

Codes and Abbreviations

Intermediate Course Codes

Each unique course code is composed of five characters with a course title associated with it.

Number of Characters	Field	Description
1	Grade	7 = Grade 7 8 = Grade 8 9 = Grade 9
3	Subject	Example: MAT = Mathematics, SOC = Social Studies
1	Program	The fifth character is used as a program identifier as well as to distinguish between courses that would otherwise be identical in their coding. A to E = English-language courses F to J = French immersion courses M to Q = French-language courses W to Z = local program courses
1	Program Description	There may be a sixth character in a code that distinguishes between programs that would otherwise be identical in their coding.

Course Code (E)	Course Code (FI)	Title

Time on Task for Intermediate Subjects

For the English and French First Language programs, the time allotment for each of the subject areas shall fall within the following ranges:

Language Arts	18 - 22%
Mathematics	18 - 22%
Social Studies	13 - 15%
Science	13 - 15%
Other Official Language	11 - 13%
Physical Education	4 - 6%
Health Education	4 - 6%

Exploratory Programs

Art, Music, Technology Education	
Home Economics, etc.	7 - 13%
Locally Determined Time	1 - 3%

For the French Immersion programs, the time allotment for each of the subject areas taught in French shall fall within the following ranges:

Late French Immersion

Grades 7 and 8

French Language Arts	18 - 22%
Mathematics	18 - 22%
Social Studies	13 - 15%
Science	13 - 15%
Health	4 - 6%

* A minimum of 75% of courses in French must be provided to Late Immersion students.

Grade 9

French Language Arts	18 - 22%
Social Studies	13 - 15%
Science	13 - 15%

* A minimum of 50% of courses in French must be provided to Late Immersion students.

Continuing/Early French Immersion

Grades 7, 8, 9

French Language Arts	12 - 18%
Social Studies	13 - 15%
Math	13 - 15%
Science	13 - 15%
Health	4 - 6%

* A minimum of 50% of courses in French must be provided to Continuing/Early and Middle Immersion students.

The time allotments for both programs are based on a 300 minute instructional day.

Abbreviations

Most of the instructional materials listed for the school programs and courses described in this document appear as indicated by the following example:

Title and Author	Publisher	Ratio	Item Number
Helen Keller by M. MacDonald	SCH	1/p	104-4042

Please note:

1. The publisher abbreviations and the publishers they refer to are listed on the following pages.

2. The ratios at which instructional materials are provided have meanings as indicated by the following examples:

   1/p - one per pupil
   1/10p - one per 10 pupils
   1/t - one per teacher
   1/c - one per class
   1/s - one per school
   1/u - one per education authority
   1/ws - one per work station
   cs/s - one class set per school
   cs/t - one class set per teacher

3. The stock number is a unique number for each item. The numbers are assigned by the Provincial Learning Materials Distribution Centre (PLMDC).

4. There is a unique course code for each subject in the curriculum and the course code for each section is explained. Furthermore, the code is used at the beginning of the description of each course.

Intermediate Program of Studies

English Programs

Arts

Music

The music education courses strive to provide musical development experiences that will enable students to

- develop a love and enjoyment of music as a lifelong activity;
- respond intellectually and emotionally to music;
- develop creative skills and concepts through such activities as musical arrangement, composition, improvisation, interpretation, and performance;
- develop the ability to make intellectual and aesthetic judgments based on critical listening and analysis of music;
- recognize, interpret, and perform the elements of music (rhythm, pitch, harmony, form, expression) as they appear in musical notation;
- develop, and reinforce through practice, musical techniques and skills; and
- explore and develop an understanding of cultural, historical, and stylistic perspectives in music.

The music education courses also provide personal development experiences that will develop positive attitudes and effective strategies of learning in music. Students are encouraged and supported to:

- enhance their self-esteem and self-confidence through ones' own musical involvement;
- develop respect for the abilities and efforts of self and others;
- develop a sense of dedication and commitment;
- demonstrate motivation both individually and collectively;
- develop abilities to cooperate and work responsibly with others in group activities and performances;
- develop self-expression and communication through music;
- develop skills of concentration;
- develop skills of self-evaluation and peer-evaluation;
- develop organizational skills;
- develop skills of effective leadership; and
- develop physical skills in music (e.g., fine-motor skills, breathing, posture).

Instrumental Courses	Vocal Courses	Strings Courses
7MUSA 8MUSA 9MUSA	7MUSB 8MUSB 9MUSB	7MUSC 8MUSC 9MUSC

Please note that where intermediate courses are taught, they are arranged in six levels, each level corresponding to a year of study. The first three levels will pertain to intermediate schools only. (Detailed information may be found in the document *Instrumental Music Curriculum: Intermediate and Senior High Band.)*

The 7-9 music program framework and curriculum are currently being reviewed.

Visual Arts

The emphasis for learning in Intermediate Visual Arts, Level 1 and 2 is on the creation of images. The historical content (Prehistoric, Indigenous, Ancient, and Renaissance Art) is used to support, motivate, and create context. Through images from the past and present, students will come to an understanding and appreciation of the history, storytelling, media, and composition of the visual arts. It is the purpose of this course that through creative and critical art making and viewing, students will come to better value, understand, and enjoy the intercultural visual images in their lives.

The focus for student learning in this curriculum is on the creation of images. Therefore, 80% of the classroom experience would consist of "hands on" time, and 20% of the classroom experience would be on Atextbook learning."

The visual arts outcomes for the intermediate years are extended over the two levels. These two levels can be scheduled over two or three years. Painting and drawing must be completed in order to continue to the next level. The time allotted to this subject area can vary. Though the 3-D Form Unit and Printmaking Unit are optional, they are both recommended for students' artistic development. If taught, it is suggested that 3-D forms be taught before proceeding with the unit on printmaking. Students will have the opportunity to explore 2-D shapes through drawing, painting, and printmaking.

The suggested time on task for each unit at each of the two levels is as follows:

- Drawing - 30% - To be completed (22 hrs)
- Painting - 40% - To be completed (28 hrs)
- 3-D Form - 15% - Optional, but highly recommended (10.5 hrs)
- Printmaking - 15% - Optional, but recommended (10.5 hrs)

The offering of Level 1 and Level 2 depends on the scheduling structure in a school. Level 1 could be introduced at Grade 7, 8, or 9. If Level 1 is completed by the end of Grade 7 or 8, a school could offer Level 2 in Grade 9. The preferred option would be that students would experience two levels of visual arts in the exploratory time over the three year period.

Where art courses are offered, they may be designated 7ARTA for a Grade 7 course, similarly Grade 8 courses may be designated 8ARTA, and Grade 9 courses may be designated 9ARTA.

Additional Note:

The resource, *Narratives of Nationhood* www.nationhood.ca, is available to Grade 8 art classrooms. This resource is also used in Grade 8 social studies.

Communication and Information Technology (CIT) Integration

Rationale:
To focus on how communication and information technology can be used from Grades 7-9 and across all areas of the curriculum as part of a more global strategy that will contribute to the development of technologically competent and literate individuals graduating from our school system.

Advantages of Technology Integration:
Integration of technology into the curriculum

- ensures that curriculum is the principal focus, rather than technology;
- promotes the development of creative thinking, critical thinking, research, communication, and problem-solving skills;
- provides access to rich resources and learning experiences that can extend far beyond those offered in traditional classrooms;
- motivates students to complete learning tasks and become more readily engaged in their own learning;
- supports current research which suggests that people learn in a holistic fashion rather than in a compartmentalized manner;
- supports contemporary approaches to education such as cooperative learning, constructivism, resource-based learning, and individualized learning;
- provides teachers with an additional means to address multiple learning styles;
- provides students with the opportunity throughout their school career to expand and reinforce their repertoire of technology skills;
- enables students to acquire a better understanding of how to use technology in meaningful ways;
- ensures that all students have the opportunity to develop technological competencies;
- prepares students to select appropriate technologies to complete tasks; and
- provides teachers with an opportunity to model lifelong learning as students witness teachers learning and using new skills for a purpose.

The documents *Working Toward Communication* and *Information Technology Literacy Grade 7 to Grade 9* were distributed and implemented. These document**s** contain descriptions of CIT Outcomes and lesson plans with links to specific curriculum outcomes. These documents are also available online at:
https://www.princeedwardisland.ca/en/information/education-early-learning-and-culture/communication-and-information-technology-curriculum

Intermediate Technology Resources:
Online curriculum guides, professional development resources, and specific grade level lesson plans are available at:
https://www.princeedwardisland.ca/en/information/education-early-learning-and-culture/communication-and-information-technology-curriculum

Software, Applications, and Extensions

Approved software, applications, and extensions for student learning can be found by using the following link : **http://bit.ly/peiapps**

This is a living resource, software, application, and extension are added or removed on an ongoing basis based on an evaluation process. Applications/extensions are available to users who log into their @cloud.edu.pe.ca accounts. These applications may be updated, changed, or added to without notice.

English Language Arts

The English Language Arts Program for grades seven through nine engages students with opportunities to experience the power of language through a variety of activities and approaches. The application of the processes within the three integrated strands of language arts (speaking and listening, reading and viewing, and writing and representing) allows students to enhance their literacy skills, communication skills, and cultural understanding; develop a knowledge and appreciation of literature; and aspire to be lifelong readers and writers who engage in creative and critical thinking within a full range of contexts and purposes associated with the use of language.

Effective literacy instruction focuses on developing strategic readers and writers. Learning experiences in the English Language Arts Program focus on helping students develop, select, and apply appropriate cognitive strategies as they interpret and create various types of print, digital, and electronic forms of text. Differentiated instruction is offered as a feature component of the resources. This allows students to have their individual learning needs met while gaining confidence in using strategies that best fit a learning activity. The gradual release of responsibility approach is also supported by the instructional resources as students move from a high level of teacher support to the independent practice of applying new strategies.

Assessment and instruction are linked in the English Language Arts Program. Assessment for learning involves frequent interactive assessments designed to make student understanding visible so teachers are able to identify learning needs and adjust their teaching accordingly. Assessment as learning actively involves students' reflection on their learning, and monitoring of their progress. Assessment of learning involves strategies designed to confirm what students know, demonstrate whether or not they have met curriculum outcomes, or make decisions about future learning needs.

Students will read independent books daily and engage in plenty of independent reading to provide them with authentic and meaningful literacy experiences, and to create opportunities for them to apply the strategies and skills they have learned. There are a variety of novels and reading materials available to all students in the form of book club selections, whole classroom libraries, and audiobook applications.

Home Economics

The Home Economics curriculum focuses on health literacy interconnecting social and cultural sense, food nutrition, food skills, life skills and health related behaviors. The hands-on exploration in this curriculum is an excellent basis for young people to develop healthy lifestyles that should be seen as an investment in their future.

The Home Economics Program is authorized for use in all the intermediate grades. The guidelines for the Intermediate Home Economics program are included in the curriculum guides.

Areas of Study include:

Basic Food	Clothing
● Food and Kitchen Safety ● Canada's Food Guide ● Food Nutrients and Dietary Guidelines for Healthy Eating ● Lab Procedures ● Meal Planning ● Table Etiquette Setting ● Historical Evolution of Food ● Multicultural Foods ● Career Awareness	● Small Equipment ● Sewing Machine ● Preparation for Sewing ● An Introduction to Basic Construction Techniques ● Fibre Identification ● An Introduction to Clothing Care ● An Introduction to Clothing Selection

Career and Technical Education

Renewal of curriculum begins with the common understanding that K-12 students must engage in learning that enables them to participate in a world of rapid and complex change. This dynamically evolving environment requires that students develop multiple literacies, increase depth of knowledge, and acquire a range of skills, attitudes, and abilities that foster creativity, innovation, and problem-solving skills.

Students must also develop a desire for personal and collective achievement, and a willingness to collaborate for the well-being of themselves, others, and beyond. It is essential that educators and administrators have an in-depth understanding of curricular expectations as part of a broader learning continuum.

Importance of Career and Technical Education

Career and Technical Education (CTE) provides relevance to learning and values the technical skills required to complete meaningful work as equally important to the academic skills required. This blend of thinking and doing is fundamental for CTE students to fully comprehend and demonstrate competency within CTE programming. The false dichotomy between hands on and heads on education is no longer relevant to modern education systems or modern economic systems. The current labour market demands that people have the ability to acquire skills, build proficiency, seek out critical knowledge and adapt to an ever-changing landscape. To this end students must be lifelong learners who commit to cultivating their knowledge and skills through a combination of experience and education.

High quality Career and Technical Education programs prepare students for success by incorporating rigorous academic and technical skills, essential workplace competencies, and a commitment to career education. Thinking and doing are not at odds; rather each is critical for the development of the other and success of the learner.

Career and Technical Education curricula are designed to foster the development of all learners as technologically literate and capable citizens who possess the technical skills, strategic knowledge, and agility required in the development of innovative and responsible solutions to relevant technical problems and the career awareness required to transition to further education and work after secondary school.

Goals for Career and Technical Education

Students will develop:

- the technical skills, confidence, and employability skills needed to gain employment within their area of interest along with the critical thinking and problem solving skills required to sustain employment.
- the academic skills required to further their education and to embrace the ever-changing reality of technical work as active learners and innovators with an entrepreneurial spirit.

- the knowledge, skills, and attitudes that will enable the agility required to be actively engaged in the development and implementation of their own career plan.

Background

The Intermediate Technology Education program is designed as a 75 hour program delivered over three (3) years. The outcomes are broken into two levels to enable schools the flexibility required to deliver this program in a wide variety of school configurations and schedules.

By the end of grade nine (9) students are expected to have demonstrated competency with the Level II outcomes. The Level I and Level II outcomes are designed to scaffold required skills and knowledge directly (ie. Level I A.1 scaffolds directly to Level II A.1), this enables all learners to progress towards mastery at their own pace and challenges instructors to differentiate instruction and facilitate learning experiences that encourage students continued growth.

Intermediate Technology Education Unit Breakdown

- Unit A - Safety (2 outcomes)
- Unit B - Technical Skills (4 outcomes)
- Unit C - Design & Critical Thinking (2 outcomes)

Course Descriptions

Level I

The Intermediate Technology Education Level I program is designed to introduce students to working and learning in a Technology Education environment. Students will experience working with a variety of tools and materials to develop solutions to technical problems. Students will be introduced to the concept of DESIGN as a creative process that allow people to plan, create, modify and/or build products, systems, or solutions to problems. Students will begin to use the engineering design process to solve simple tasks or problems. The focus of the course is on building technical skill, learning through failure, and redesigning past solutions to problems. Students are expected to be working safely and responsibly in a technical classroom, building technically proficient skills involving hand tools and materials, following safe work procedures when operating power tools, and engaging with the work with a spirit of curiosity, critical thinking, and innovation.

Level II

The Intermediate Technology Education Level II program is designed challenge students ability to use the engineering design process to develop creative and innovative solutions to complex technical problems. Building on their prior knowledge; students will document and record their process; from clearly defining the problem(s) and identifying criteria and constraints through to building and evaluating design solutions. The focus of the course is on building technical skill, learning through failure, and designing technical solutions to problems. Students are expected to be working safely and responsibly in a technical classroom, building technically proficient skills involving the safe use of variety tools and materials, and engaging with the work with a spirit of curiosity, critical thinking, and innovation.

Mathematics

The Prince Edward Island mathematics curriculum is shaped by a vision which fosters the development of mathematically literate students who can extend and apply their learning and who are effective participants in an increasingly technological society. The teaching and learning in mathematics classrooms should enable all students to:

- use mathematics confidently to solve problems;
- communicate and reason mathematically;
- appreciate and value mathematics;
- make connections between mathematics and its applications;
- commit themselves to lifelong learning; and
- become mathematically literate adults, using mathematics to contribute to society.

Fundamentally, mathematics is a set of ideas. The intent of the PEI mathematics curriculum is to ensure that students understand these ideas, not just master the rules and procedures. At the same time, it is essential that students accomplish a certain level of skill proficiency so that they have the tools to solve interesting and relevant problems. Practice of skills is usually more effective if the practice arises in meaningful contexts.

The outcomes for the mathematics curriculum are organized in terms of four content strands:

- number;
- patterns and relations;
- shape and space; and
- statistics and probability.

In summary, instructional practices in mathematics should promote the following beliefs:

- Mathematics learning is an active and constructive process.
- Learners are individuals who bring a wide range of prior knowledge and experiences, and who learn via various styles and at different rates.
- Learning is most likely to occur when placed in meaningful contexts and in an environment that supports exploration, risk taking, and critical thinking that nurtures positive attitudes and sustained effort.
- Learning is most effective when standards of expectation are made clear with ongoing assessment and feedback.

The Prince Edward Island Mathematics Curriculum Guides for Grades 7, 8, and 9 based on the Western and Northern Canadian Protocol for Collaboration in Education, provide a philosophical and pedagogical underpinning for the mathematics education in our province.

Physical & Health Education

The aim of the physical & health education curriculum is to provide opportunities for learners to develop knowledge, skills, and positive attitudes to engage in healthy behaviours, healthy decision making and lead a physically active lifestyle. The curriculum will support learners in acquiring the understandings and skills to be physically literate, health literate and contribute to a healthy community.

The goals of physical & health education are integrated and are of equal importance. The three goals for learners from Grades 7-9 are the following:

- *Physical Literacy* – developing the motivation, confidence, physical competence, knowledge and understanding to value and take responsibility for engagement in physical activities for life. Enjoying and engaging in healthy levels of participation in movement activities to support lifelong active living in the context of self, family, and community.

- *Health Literacy* – developing the cognitive and emotional skills which determine the motivation and ability of learners to gain access to, understand and use information in ways which promote and maintain good health. Including developing healthy *relationships by* balancing self through safe and respectful personal, social, cultural, and environmental interactions.

- *Healthy Community* - connecting our learners to their communities inside and outside of the school to improve their own health and the health of others. Learners will develop goal setting skills, social skills, career development skills and engage in service learning opportunities in their communities.

Resource-Based Learning and School Library Programs

The CAMET/APEF and Prince Edward Island curricula and programs promote resource-based learning as a key instructional approach across all grade levels, subjects, and disciplines. This means that the integrated school library program should support the development of students' information literacy through resource-based learning activities at all grade levels across the curriculum. Resource-based learning actively involves students in the effective use of a wide range of print, non-print, electronic, and human or community resources. Teachers and teacher-librarians need to ensure that all students are involved in activities emphasizing skills and strategies required to think critically about the information they access, use, and apply, regardless of the source or format. They also need to assess students' learning (processes and products) for evidence of 'learning about' rather than simply 'finding out about' information-related topics, problems, and issues.

Schools should have a plan for making optimal use of the school library (facility, collection of learning resources, and instructional program), and for ensuring that students are achieving the skills outlined for their specific grade level in the School Library Skills Continuum. The school library's centralized collection of learning resources should include print material (books, periodicals, including fiction and nonfiction), non-print materials (including audio, visual, databases, computer software), and the equipment necessary to manage, use, or produce them. Collections of learning resources need to be viewed from several perspectives, on-site, locally, regionally, and globally, and selected primarily to support the school curriculum and learners' needs. Library-resource centres are increasingly viewed as access points to information within and beyond the school; learning resources, including human resources, are frequently accessed or borrowed, and shared among other school or public collections and from community agencies.

The selection of supplementary learning resources for school library collections is another important role of school library personnel. Support is available from the Department of Education and Lifelong Learning; and selection lists of suggested resources across the various curriculum areas, as well as information about a variety of selection aids and sources for assistance (print, online, and leader's services) are available in the *PEI School Library Handbook*. The School Library Standing Committee has also developed *The Evaluation and Selection of Learning Resources: A Guide,* a document to assist educators in selecting materials.

Support for school library instructional programs is available in the form of professional development days, services offered by leaders, the revised edition of the School Library Skills Continuum, and a portion of the *PEI School Library Handbook* which is devoted to curriculum and instruction.

Science

The Prince Edward Island science curriculum is guided by the vision that all students will have the opportunity to develop scientific literacy. **Scientific literacy** is the set of knowledge, skills, and attitudes that enables an individual to inquire, problem solve, critically evaluate and make well-informed decisions, and maintain a sense of wonder about the world around them. During intermediate grades, students will transition from early exploratory phases of scientific literacy and begin to approach scientific inquiry and critical thinking more systematically.

7SCIA Science

- Interactions with Ecosystems
- Earth's Crust
- Heat
- Mixtures and Solutions

8SCIA Science

- Water Systems
- Fluids
- Optics
- Cells, Tissues, Organs, and Systems

9SCIA Science

The Grade 9 science curriculum is designed to shift the focus away from a primary emphasis upon science topics or content, towards scientific literacy as defined by the four identified foundations: ***Nature of Science***, ***Procedural Knowledge***, ***Content Knowledge***, and ***Decisions and Perspectives***. It is expected that students will be engaged in a hands-on, minds-on approach that will encourage them to recognize that science is not only a body of knowledge but a process of understanding and reasoning. Competencies such as critical thinking and citizenship will be fostered when students examine controversial and real-world issues such as pseudoscience, biodiversity, sustainability, climate change, over-population, and clean energy.

Seven questions which are intricately linked to these foundations will be interwoven within instructional activities throughout the year.

- What is science?
- What is not science?
- What does doing good science look like?
- What have we learned from science?
- How can we apply science to solve human problems?
- What should we consider before we apply science to solve problems?
- How does science relate to me today and in the future?

Traditional content remains an integral part of this course but is viewed as the context through which science is learned. The three topics identified as context for grade nine are Biodiversity & Sustainability of Ecosystems (life science), Patterns in Atoms, Elements, and Compounds (physical science-chemistry), and Understanding Electricity (physical science-physics).

Social Studies

7SOCA Social Studies

The Grade 7 social studies course focuses on the theme of empowerment and disempowerment in Canada. Inquiry methods and geography skills are used to help students investigate the meaning of empowerment within five different contexts: economic, political, cultural, societal, and national. Students will explore the time period of 1830-1920, the empowerment issues and events of this era, and make comparisons and connections to today's local and global issues. Students will be encouraged to apply their knowledge of empowerment from a historical viewpoint to inform their actions as active citizens in today's society.

8SOCA Social Studies

The focus of the Grade 8 years study is Canadian identity and its varied cultural, political, and societal roots. The Grade 8 social studies course complements the Grade 7 program by continuing the study of Canada's post-war 1920s era up to present-day Canada. Students begin by examining the general concept of Canadian identity and then they explore this concept within the contexts of geographic influences, decades of change, and citizenship. The final unit, a project-based expression of their own understanding of Canadian identity, will be discussed in the earlier stages of the program, worked on over the course of study, and presented in the final weeks of the program as a culmination activity.

9SOCA Social Studies

The Grade 9 social studies program, *Interdependence*: *Atlantic Canada in the Global Community* examines the role of Atlantic Canada within a global context. The course emphasizes the interdependent nature of today's world and the balance of globalization with sustainability. Students will examine key issues within culture, trade, environment, and human rights in Atlantic Canada and the broader world. The culminating unit on global citizenship requires students to analyse an issue and develop a possible, age-appropriate plan of action to address the issue.

French Programs

Core French

The Grades 7-9 Core French Program is designed to empower students with confidence in learning and using French. The program is function-driven and based on purposeful, action-oriented tasks set in a variety of authentic contexts, which students face in the daily lives.

Course Outline Information

The Français de base 7e, 8e, 9e programme d'études (Intermediate Core French 7-8-9 Curriculum Guide), 2017 is available from the Department of Education and Lifelong Learning and on the Learn platform (learn.edu.pe.ca)

Time Allocation for Core French Programs

As outlined in a departmental directive, the time allotment for intermediate core French is 11-13%. This is the equivalent of 198-234 minutes in a 6-day cycle or 264-312 minutes in an 8-day cycle. Classes of 60 minutes every other day provide students with a more authentic and intensive language learning experience.

French Immersion Programs

At the intermediate level, three French immersion programs are available: the Continuing/Early French Immersion program (EFI) from kindergarten to Grade 9; the Middle Immersion program (MI) from Grades 4 to 9, and the Late Immersion program (LFI) from Grades 7 to 9. Please note that from Grades 10 to 12, all immersion students are enrolled in one single French immersion program (with no specific designation); by the end of Grade 9, late French immersion students as well as Middle Immersion are expected to perform at the same level of proficiency as their peers in early French immersion programs.

The Minister's Directive Concerning Intermediate School Subject Time Allotments is as follows:

Late French Immersion

Grades 7 and 8

French Language Arts	18-22%
Mathematics	18-22%
Social Studies	13-15%
Science	13-15%
Health Education	4-6%

* A minimum of 75% of courses in French must be provided to Late Immersion students.

Grade 9

French Language Arts	18-22%
Social Studies	13-15%
Science	13-15%

* A minimum of 50% of courses in French must be provided to Late Immersion students.

Continuing/Early and Middle French Immersion Grades 7, 8, and 9

French Language Arts	12-18%
Social Studies	13-15%
Math	13-15%
Science	13-15%
Health Education	4-6%

* A minimum of 50% of courses in French must be provided to Continuing/Early and Middle Immersion students.

Early French Immersion and Middle French Immersion (EFI & MI)

The Continuing or Early French Immersion program is a French-as-a-second-language program which offers instruction in French. The subjects available in French are French language arts, health education, mathematics, science, and social studies. All of these subjects are not taught in every immersion school. The French immersion courses offered in Grades 7, 8, and 9 are intended to ensure the reinforcement and development of language skills on a continuum, with the intent of bringing all students to the same level of proficiency at the end of Grade 9. Please note that French language arts curricula for the EFI program are currently being revised.

Late French Immersion (LFI)

Late French Immersion is a French-as-a-second-language program which offers instruction in French during a minimum 75% of the six day cycle in Grades 7 and 8 and 50% in Grade 9. Beginning in Grade 7, the program is intended for students who have had French in a core or intensive French program environment during the elementary school years. English language arts continues to be offered as in the regular English program.

Exposure to the French language continues through to the completion of high school, but over time, the time per day spent in French decreases. Those subjects that are offered in French at the various grade levels are as follows:

Grade 7 75 % in French through the following courses:	**Grade 8** 75 % in French through the following courses:	**Grade 9** 50% in French through the following courses:
French Math Social Studies Science Health Education	French Math Social Studies Science Health Education	French Social Studies Science Health Education

French Language Arts (French Immersion)

Early French Immersion/Middle Immersion

Students participate in communicative tasks targeting the acquisition of four basic skills: reading, listening, writing, and speaking (in front of an audience or interrelationally). These tasks are contextualized to four or five themes and two projects during the year; they allow students to enhance and develop their skills in planned and spontaneous oral and written communicative situations by using the informative, narrative, expressive, persuasive, social, and poetic functions of the French language. Students also participate in activities aimed at understanding and appreciating prescribed literature and audio-visual materials. These language skills are part of a continuum of communication abilities and developed through an action-oriented approach. Please note that French language arts curricula for the EFI and MI programs are currently being revised.

Late French Immersion

A French second language methodology is used to develop the four basic communication skills: listening, speaking, reading, and writing in the Late Immersion Program. Due to the heavy concentration of time in French in all subjects, the students progress rapidly through the program, developing linguistic and communicative proficiency and confidence. The program also includes an introduction to literature, beginning with a collection of easy texts in Grade 7 and moving to more challenging ones in Grades 8 and 9. Throughout their intermediate years, late French immersion students are also exposed to a variety of audio-visual materials to develop their listening, speaking, and comprehension skills. These language

skills are part of a continuum of communication abilities and developed through an action-oriented approach. Please note that French language arts curricula for the LFI program are currently being revised.

Health (French Immersion)

The aim of the intermediate health curriculum is to enable students to make well-informed, healthy choices and to develop behaviours that contribute to the well-being of self and others. To achieve this aim, students require an understanding of self as the basis for healthy interactions with others, career development, and lifelong learning. Students also require a safe and caring school and community environment in which to explore ideas and issues surrounding personal choice, to seek accurate information, and to practise healthy behaviours.

The health curriculum framework is built around three general curriculum outcomes:

Wellness Choices: Students will make responsible and informed choices to maintain health and to promote safety for self and others.

Relationship Choices: Students will develop effective interpersonal skills that demonstrate responsibility, respect, and caring in order to establish and maintain healthy interactions.

Life Learning Choices: Students will use resources effectively to manage and explore life roles, and career opportunities and challenges.

Additional Notes

1. Time allotment should be about 90 minutes per 6-day cycle.
2. Parental permission is required in order for students to take part in the study of human sexuality.

Mathematics (French Immersion)

The Prince Edward Island mathematics curriculum is shaped by a vision which fosters the development of mathematically literate students who can extend and apply their learning and who are effective participants in an increasingly technological society. The teaching and learning in mathematics classrooms should enable all students to:

- use mathematics confidently to solve problems;
- communicate and reason mathematically;
- appreciate and value mathematics;
- make connections between mathematics and its applications;
- commit themselves to lifelong learning; and
- become mathematically literate adults, using mathematics to contribute to society.

Fundamentally, mathematics is a set of ideas. The intent of the PEI mathematics curriculum is to ensure that students understand these ideas, not just master the rules and procedures. At the same time, it is essential that students accomplish a certain level of skill proficiency so that they have the tools to solve interesting and relevant problems. Practice of skills is usually more effective if the practice arises in meaningful contexts.

The outcomes for the mathematics curriculum are organized in terms of four content strands:

- number;
- patterns and relations;
- shape and space; and
- statistics and probability.

In summary, instructional practices in mathematics should promote the following beliefs:

- Mathematics learning is an active and constructive process.
- Learners are individuals who bring a wide range of prior knowledge and experiences, and who learn via various styles and at different rates.
- Learning is most likely to occur when placed in meaningful contexts and in an environment that supports exploration, risk taking, and critical thinking and that nurtures positive attitudes and sustained effort.
- Learning is most effective when standards of expectation are made clear with on-going assessment and feedback.

The Prince Edward Island Mathematics Curriculum Guides for Grades 7, 8, and 9, based on the Western and Northern Canadian Protocol for Collaboration in Education, provide a philosophical and pedagogical underpinning for the mathematics education in our province.

Science (French Immersion)

The majority of our knowledge, one of our greatest resources, has a scientific basis. Technological advances have considerably changed or modified the quality of life on earth. We have learned over the years that it is not only important to understand the principles which guide these advances but also to weigh the possible goals and consequences of these scientific breakthroughs.

Science and technology will always play an integral role in our students' lives whatever path they decide to follow. It is essential that students learn more about the world around them so that they can take advantage of the scientific developments and technologies that will hopefully enhance their lives and their environment.

Our program takes on a very interactive approach to science, which promotes reflection on behalf of the student. The emphasis is placed on problem solving current and relevant issues, which, in turn, motivates the use of the scientific method. This includes questioning, formulating, predicting, imagining, organizing, making, verifying, observing, interpreting, inferring, and working together efficiently as a team.

Social Studies (French Immersion)

The notes that follow apply to early, middle, and late French immersion social studies programs; the courses and instructional materials are listed separately.

Learning social studies is an opportunity to understand the world in which one lives. Skills that students practise in social studies will serve for an entire academic career and beyond. They will develop the ability to think critically, to retrieve and process information, to apply knowledge, and continue to develop their French communication skills orally and on paper. These goals are reflected in the *Philosophy of Education for P.E.I.* and form the backbone of the French immersion social studies program.

With this in mind, the content of the social studies program is seen as a vehicle for developing skills related to social studies. By and large, the context for developing those skills in intermediate French immersion is ancient societies in Grade 7, societies of the past in Grade 8, and Atlantic Canada in the global community in Grade 9. However, in order to reflect the global community to which we belong, teaching strategies in all social studies courses include addressing current events at all levels, thus lending importance and relevance to student learning.

Since a goal of the French immersion program is to develop the full second language potential of students, this dimension of the social studies program presents a particular challenge for students and teachers. Consequently, teaching and learning strategies which enhance and encourage the development of written and oral skills with French language are also promoted.

Please note that all subjects include a language development component in addition to specific content components, and that the development of communication skills is as equally important as the content areas.

Social studies are introduced in Grade 4 but the foundation for a formal social studies program is laid in Grade 7 with a geography and history-centred curriculum.

According to Van Santbergen, the onset of adolescence is characterized by a curiosity about the past. This is borne out when students are asked to look at the past through an inquiry based approach, and when they demonstrate a curiosity about the way things were. A goal of the Grades 7 and 8 social studies courses is to develop skills which will allow students to understand the influence of people and events in the past so that they may better appreciate the realities of present-day Canada.

These realities, past and present, are largely the result of geographical and cultural considerations, such as terrain, climate, vegetation, natural resources, traditions, and lifestyles. For this reason, it is important for students in Grade 7 and 8 to see the inherent links between history and geography.

Van Santbergen goes on to suggest that at approximately age 14, with the expanding adolescent mind, comes a preoccupation with the present, especially surrounding social realities. This stage is ripe to develop critical thinking and the ability to analyse, synthesize, formulate, and justify opinions and draw conclusions.

The Grade 9 social studies course is an introduction to three social sciences, sociology, political science, and economics; however, since history and geography form the organizational base for all social sciences, a review of the history and geography of the Atlantic region is necessary to set the stage for examining cultural, social, political, and economic realities of the region in which we live.

This course also draws heavily from current events at the local, national, and international level. To isolate the Atlantic region in the classroom would be counter-productive to the goals of the course.

7SOCF Social Studies

The Grade 7 social studies program *Sociétés anciennes* (Ancient Societies) focuses on the development of human societies. In this activity-based course, students are asked to use an investigative approach to discover how humans lived as a group on a particular territory at a certain point in time. Major themes studied in this course include geography, social organization, political, and economic structures through three societies of classical antiquity highlighted by the Grade 7 social studies program: Ancient Egypt, Ancient Greece (Athens), and the Roman Empire. This course offers many opportunities for activities of comparison and connections with present-day Canada.

8SOCF Social Studies

The Grade 8 social studies program is a sequel to the Grade 7 program *Sociétés anciennes* (Ancient Societies) in the sense that it presents the same approach and structure. It begins with a look at the causes of the fall of the Roman Empire and a brief survey of the political and economic situation in Western Europe at the beginning of the Middle Ages. In the Grade 8 program *Sociétés du passé* (Societies of the Past), the same major themes (geography, social organization, political, and economic structures) are used to examine three new societies: medieval England and France, Renaissance Italy, and Atlantic Canada (*Acadie*) during the French Regime. As it is the case with the Grade 7 program, this course, based on an investigative approach, aims at giving students opportunities to work with many types of documents and sources (primary and secondary), and to make connections with present-day Canada.

9SOCF Social Studies

The Grade 9 social studies program is organized into three modules that offer students an opportunity to explore social sciences other than history. The titles of the modules are: 1) Politique (politics); 2) Géographie (geography), and 3) Éducation planétaire (the global classroom).

The politics module focuses on civics and aims at educating the citizens of tomorrow. The approach used in this module allows students to become familiar with our country's (and our province's) political issues in order to be able to form their own opinion about a specific issue. The Canadian political system is also at the core of this module.

The geography module invites students to develop their geographical thinking skills by examining two "territoires types" (territories that are flash points of contemporary issues). The two "territoires types" are the urban territory and regional territory. These case studies highlight different types of territorial issues that can relate to issues such as the environment, standards of living, and sustainability.

The global classroom module explores the interconnectedness between the Atlantic region and the broader world. It provides opportunities to study different global issues and what they mean for Atlantic Canadians, and the ways in which our local, national, and global relationships continue to evolve and play important roles in our society today.

All three social studies programs have been developed on the six concepts of geographical and/or historical thinking to encourage students to reflect upon and investigate history and geography and not simply to remember facts.

Communication and Information Technology (CIT) Integration (French Immersion)

Rationale:
To focus on how communication and information technology can be used from Grades 7-9 and across all areas of the curriculum as part of a more global strategy that will contribute to the development of technologically competent and literate individuals graduating from our school system.

Advantages of Technology Integration:

- Integration of technology into the curriculum;
- ensures that curriculum is the principal focus, rather than technology;
- promotes the development of creative thinking, critical thinking, research, communication, and problem-solving skills;
- provides access to rich resources and learning experiences that can extend far beyond those offered in traditional classrooms;
- motivates students to complete learning tasks and become more readily engaged in their own learning;
- supports current research which suggests that people learn in a holistic fashion rather than in a compartmentalized manner;
- supports contemporary approaches to education such as cooperative learning, constructivism, resource-based learning, and individualized learning;
- provides teachers with an additional means to address multiple learning styles;
- provides students with the opportunity throughout their school career to expand and reinforce their repertoire of technology skills;
- enables students to acquire a better understanding of how to use technology in meaningful ways;
- ensures that all students have the opportunity to develop technological competencies;
- prepares students to select appropriate technologies to complete tasks;
- provides teachers with an opportunity to model lifelong learning as students witness teachers learning and using new skills for a purpose.

The documents *Working Toward Communication* and *Information Technology Literacy Grade 7 to Grade 9* were distributed and implemented. These document**s** contain descriptions of CIT Outcomes and lesson plans with links to specific curriculum outcomes. These documents are also available online at

Queens County Fiddlers Repertoire Queens County Fiddlers Charlottetown, PEI	NAM	107-7715

***Please note that each school should have nine pieces per grade level (which should have been ordered during the implementation stage). These pieces are listed for replacement purposes of already existing pieces that are in each school or for new music programs that are being started in the Intermediate Schools. If classes have expanded in size, schools are able to order more of what they already have. Please contact the Arts Leader to do this.**

French Programs

Core French

The new Core French program is taught using a literacy approach, and also reflects the influence of the action-oriented approach presented in the Common European Framework of Reference for Languages. The program focuses on the development of all four communication skills – listening, speaking, reading, and writing – in French, with particular emphasis on spoken interaction. As well, the program contributes significantly to the general education of the learner. The program is organized around modules that reflect the interests and experiences of the intermediate student. Throughout each module, students are actively involved in a variety of activities and tasks that are authentic and pertinent to the learner and to the world beyond the classroom.
